Angga Firmansyah

ERP Tech Consultant , Digital ERP Strategist , ERP Transformation Expert | Microsoft Dynamics AX 2012, Microsoft D365 BC, Odoo | Scalable Solutions , Async & Agile , Remote-Ready , Business Value-Focused

Jawa Timur, Indonesia

Ringkasan

I didn't always set out to be an ERP consultant — but the moment I helped a struggling finance team automate their month-end process in Microsoft Dynamics 365 Business Central, I knew I'd found my path.

That project was a turning point. What started as a small customization turned into a company-wide transformation. We reduced invoice processing time by 40%, eliminated 80% of manual journal entries, and gave the finance team back what mattered most: time and clarity.

Since then, I've been diving deep into Business Central — building custom extensions, integrating third-party apps, and guiding clients through both cloud and on-prem deployments. I've worked across modules from Purchasing, Sales, Jobs, to General Ledger, and collaborated with cross-functional teams to turn fragmented workflows into efficient, automated processes.

But beyond the systems and code, I hold tight to three core values: ownership, adaptability, and human-first design. I believe ERP systems should empower teams, not overwhelm them.

If you're exploring Business Central, stuck on a process, or simply want to trade notes on ERP challenges — I'd love to connect. Let's solve something together.

Let's connect — maybe we can build something better together.

" A Man who never clever. Long Life Learner."

Pengalaman

Kano Solution

Technical Consultant

Juli 2019 - Present (6 tahun 1 bulan)

Surabaya dan Sekitarnya, Jawa Timur, Indonesia

Implemented and customized ERP solutions (Dynamics AX, Business Central, Odoo, SAP ByDesign) across multiple industries.
